

Legislative Agenda

Crumbling Concrete Foundations

A total of 37 towns, of which 20 are in CRCOG and 13 in NECCOG, have been impacted by crumbling concrete foundations related to the presence of a mineral pyrrhotite in the concrete mix. This is a significant and growing issue for homeowners and towns.

Concrete Testing Funding

NECCOG supports the use of CDBG or program income funds to help homeowners with crumbling foundations to, at a minimum, test the affected property to verify the existence of a problem. Any income restrictions for this purpose should be waived.

Remediation Fund

NECCOG supports the creation of a relief fund for homeowners experiencing crumbling foundations. CRCOG's Ad-hoc working committee (of which NECCOG is a participating member) has a template in progress that is willing to discuss with legislators details regarding the program. Some key points regarding any relief funding should include:

- Any state funding for crumbling foundations should be exempt from CHRO and prevailing wage requirements. The homeowners will be the ones who are finding contractors, etc. for this project and to require them to adhere to CHRO or prevailing wage requirements will be too high of a bar.
- In conjunction with the development of a process and a cut-off date after which buyers will no longer be eligible for relief (right now, May 10, 2016, the day Mottes ceased operating from the quarry for residential projects has been proposed), the sales disclosure statement should reflect that the buyer is aware that such a problem exists if it does not do so already.

Remediation Funding Sources

NECCOG recognizes that funding for the relief fund will be a challenge. CRCOG's Ad-Hoc Working Committee on Crumbling Foundations (of which NECCOG is a participating member) has put forward a few suggestions as a starting point for this discussion - recognizing that any funding mechanism will cause economic reverberations. This issue is a challenging and difficult one that is already having economic impact on the affected municipalities and will continue to affect those communities. Some potential suggested funding mechanisms for a relief fund are as follows:

- An increase in the conveyance tax for affected municipalities by 1/4%
- Potentially increasing sales tax on construction only by 1% or .5%
- Insurance companies: NECCOG would support the state encouraging insurance companies to participate in a relief fund to which a few insurance companies have already pledged some support.

Guaranteed Loan Fund for Concrete Remediation

NECCOG supports pursuing a potential state-guaranteed private loan fund or other private banking based loan fund to help homeowners facing crumbling foundations.

State Building Fee Waiver

NECCOG supports waiving the state portion of the building fee for any municipalities waiving fees for work on crumbling foundations.

Future Testing

NECCOG supports testing of residential and commercial concrete for the presence of pyrrhotite and possibly establishing and regulating a maximum acceptable amount to be present in concrete loads.

Time Limits for Filing Claims

NECCOG supports reviewing increasing time limits for filing claims related to crumbling foundations with insurance companies as well as examining time limits for appeals and adjudication of such claims.

Peril of Collapse Insurance Coverage

NECCOG supports requiring insurance companies to provide converge for the “peril of collapse” due to the presence of pyrrhotite resulting in the impairment of the structural integrity of the building up to \$150,000.
